Pigment Remover

The removal of pigments and dyes has never been safer

Pigments and dyes are used in various industries and good hygiene is of paramount importance when changing colours to produce high quality products.

Chemitec has extensive experience in the development and production of cleaning products that are not harmful to humans and environmentally-friendly. Chemitec knows that the industry requires specialist solutions. We maintain good relationships with people on the work floor and with pigment producers to ensure that we have first-hand knowledge of what is needed. Chemitec literally takes the care out of your cleaning concerns, wherever you may be in the world. We are the silent, innovative force in the background, which allows you to concentrate on your final product.

Chemitec has developed a water-based cleaning product that meets the highest requirements in terms of safety for humans and the environment, specifically intended for the efficient removal of pigments and dyes. Through a unique composition Chemitec has developed a product with very high penetration and solving capacity, without using substances that are harmful to humans and the environment! The product's level of biodegradability is very good, in accordance with the standard of the OECD 301B directive.

Complete cleaning of pigment mixers and related equipment without residues

TP 132 B® cleaning product for the removal of pigments and dyes. Very effective for cleaning mixing equipment in various industries.

TP 132 B® liquid water-based cleaning product. Easy processing through biological wastewater treatment.

TP 132 B® effective through high penetration power. Allows for thorough rinsing to avoid residue remnants. This results in a stable manufacturing process, which is a clear advantage.

TP 132 B® does not contain any of the solvents used in many conventional products that are harmful to humans or the environment.

TP 132 B® The product is virtually odourless, it does not release any fumes and it is not flammable, making the product safer and more pleasant to use.

TP 132 B® provides you with a more stable production process. We guarantee good quality and an economical product.

USP's :

- **The ultimate replacement for solvent products**
- **Very safe to use**
- **Water-based formulated product**
- **No harmful fumes**
- **No hazard symbols according to EC Directives**
- **Biodegradable surfactants**
- **Suitable for all surfaces, including non-ferrous surfaces**

HOW TO USE IT

1. Remove excessive product residue from the equipment with a brush or rinse with water. Apply the product all over with a low pressure sprayer
2. Allow a few minutes for absorption, depending on the type of pigmentation and the degree of the residue to be removed
3. Rinse with plenty of water under high pressure. Warm water is recommended.
4. If applied correctly there will not be any residues on the product
5. Cleaning time can be shortened considerably by cleaning units in series
